This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

MEDICAL SUPPLY TABLE

OF THE

UNITED STATES MARINE HOSPITALS.

TREASURY DEPARTMENT,
Washington, D. C., December 15, 1871.

The following Medical Supply Table of the United States Marine Hospitals will be in force from and after December 31, 1871. Paragraphs 71, 72, and 73, Revised Regulations of the Marine Hospital Service, are hereby amended in accordance therewith.

JNO. M. WOODWORTH,
Supervising Surgeon,
United States Marine Hospital Service.

Approved:
GEO. S. BOUTWELL, *Secretary.*

MEDICAL SUPPLY TABLE.

1. The standard for Medical Supplies, for Marine Hospitals of Class One, will be the Supply Table adopted by the Department. This table is given as a guide in making requisitions for such supplies, and is not intended to confine medical officers absolutely to either the articles or amounts specified. To permit medical officers to indulge in individual preferences, a secondary list of medicines has been prepared.

2. In case any article not on the supply table, or in excess of the amount allowed, shall be asked for, *the reason for such requisition must be fully stated.*

3. Requisitions for medical supplies, (Form 15,) will be made semi-annually, on the 30th of June and 31st of December of each year, and will be forwarded in duplicate to the Department.

4. Articles enumerated on the outfit list, and other miscellaneous articles, as well as those named on the regular supply table, which are required to be replenished at any time during the interim between the regular semi-annual requisitions, will be obtained on special requisition, (Form 16,) which will be made in duplicate, and separate copies submitted by the Surgeon making the requisition to at least two respectable merchants, with a request to name the price at which they agree to furnish each article.

5. The duplicate requisition, (Form 16,) together with the bids, will be forwarded to the Department for its action.

6. Semi-annual and special requisitions will invariably show the quantity on hand of each article asked for.
